

Browne Center Covid-19 Protocols for Professional Development Programs

Our goal is to maintain our effective programs while providing a safe environment for everyone

At The Browne Center, we are asking participants and visitors to help maintain an environment that minimizes transmission of COVID-19 and supports the health and safety of others in our community. We look forward to welcoming you to our beautiful center!

COVID
CORONAVIRUS
DISEASE
19

STOP THE SPREAD OF GERMS

Help prevent the spread of respiratory diseases like COVID-19.

Avoid close contact with people who are sick.

Cover your cough or sneeze with a tissue, then throw the tissue in the trash.

Clean and disinfect frequently touched objects and surfaces.

Avoid touching your eyes, nose, and mouth.

Stay home when you are sick, except to get medical care.

Wash your hands often with soap and water for at least 20 seconds.

UNH COVID-19 Outreach Task Force Requirements

To prevent the spread of COVID-19 and reduce the potential risk of exposure, participants must:

- Complete a mandatory health screening questionnaire.
- Wear cloth or disposable face coverings. *UNH/The Browne Center will not provide face coverings to participants.*
- Maintain physical distancing of a six feet minimum of between participants/staff.
- Not share equipment, devices, or other supplies.
- Maintain hygiene practices.

The following slides will detail each protocol with the specific requirements.

Mandatory Health Screening Questionnaire

To prevent the spread of COVID-19 and reduce the potential risk of exposure, all participants must complete a simple health screening. This screening must be completed on all days you are scheduled to attend a Browne Center event. Your participation is mandatory. Please complete this screening before you leave home on the day of the event.

When taking the screening, if all health protocols are met, you will receive a **green check** upon completion. You are **required to show proof of the green check** as you arrive.

We recommend you complete the screening on a mobile phone and save a screen shot or photo to present upon arriving at the event/program. Other devices can be used, as long as you have a way to present the green check with the date to Browne Center staff. Follow [this link](#) to online health screening.

If you cannot complete the screening online, a paper form is also available – see link below to download. For paper version, you can print and bring completed form to the Browne Center: https://extension.unh.edu/resources/files/Resource008083_Rep11789.pdf

Wearing Face Coverings During Program

Every participant and visitor must come with their own Face Covering and wear it throughout the program. The Browne Center will not provide Face Coverings.

Acceptable Face Coverings include hand-made cloth face covering, or commercially made disposal mask. Bandanas should only be an emergency option.

Maintain physical distancing

- Participants, visitors, and staff must maintain a six-foot minimum physical distance between one another whenever possible.
- For programming, we will stay outdoors as much as possible.
- We are limiting outdoor cohort size.
- We are limiting the number of people in building and other congregating areas.
- We are reducing the total # of visitors per day.
- We are limiting the # of distinct groups on property on same day.

Not sharing or limited contact with common equipment or other supplies

- In general, we will not share equipment or other supplies.
- "Propless" or "low prop" activities will be the norm for programming.
- If props are used, hand sanitizer will be used before and after touching.
- Individual props might be assigned for use by participants during the day. In those cases, only facilitator and participant will have been in contact with object.
- On the challenge course, there are times when a participant will touch a common item or surface. In those cases, we will provide hand-sanitizer to use prior to and after completion of the activity (common items include hand lines, ladders, climbing holds, etc).

**PLEASE DON'T
TOUCH ME**

Maintain Hygiene Practices

- Individual hygiene, especially good handwashing, is critical to limiting the spread of the virus. This will mean both staff and participants participate in regimented hygiene protocols (hand washing, hand sanitizing, cough/sneeze into elbow, avoid touching face, properly dispose of tissues, etc).
- Hand washing technique signs are posted at hand washing stations as additional reminder.

When to Wash or Disinfect Hands

- Before eating food
- After being in contact with someone who may have been sick
- After touching frequently touched surface
- After using the restroom
- After using shared/common items
- After coughing, sneezing, or blowing your nose
